PROFILE

Full-stack developer intern. I build with React, Next.js, TypeScript, Tailwind, Python, Java, PHP/Laravel, SQL and Supabase. I automate with n8n, Power BI and VBA, and deploy to the cloud with Terraform. GitHub: https://github.com/laujml

EDUCATION

01-2022 - Present
ESCUELA SUPERIOR DE ECONOMÍA Y NEGOCIOS, San Salvador, El Salvador
B.S. in Software Engineering and Digital Business

01-2011 - 10-2021
LICEO SALVADOREÑO, San Salvador, El Salvador
High School Diploma

WORK EXPERIENCE

07-2026 - Present
ALTEMPO, San Salvador, El Salvador
Full Stack Software Engineer
I work on a platform for booking musicians for events. On the backend I use Django, DRF, PostgreSQL, Redis and Celery, and I build the client and admin apps with React, TypeScript and Tailwind, using Docker.

01-2024 - 05-2024
Momentum S.A. de C.V., San Salvador, El Salvador
Financial Data Analyst
I automated the tabulation of financial data with pivot tables and VBA macros, which made the data easier to manage and ready for Power BI. This improved the team's analysis and reporting for decision making.

LEADERSHIP AND PROJECTS

09-2026 - Present
Campus Lead at Ai Labs, ESEN
I represent the Ai Labs community at my university. As part of the staff, I help organize and run tech events in El Salvador with OpenAI, SpaceXAI, ElevenLabs and others.

08-2026 - 11-2026
Featured Project: Accounts Receivable SaaS (Solvo)
Multi-tenant SaaS for small businesses (5 to 15 employees) that automates accounts receivable and financial workflows. Code and architecture: https://github.com/Jechev1/CxC_Saas.git

01-2024 - 11-2024
Director of Business Competition
Three years in the student organization (two as an active member and one as Director). I led the strategic planning and logistics for the International Entrepreneurs Congress (CIES) and the Bachiller Emprendedor program.
